
算法 0.1 线图的拓扑替代构造算法

Input: 原图 $G = (V_G, E_G)$ **Output:** 线图 $L(G)$

```
1  $V_{L(G)} \leftarrow \{(\alpha) \mid \alpha \in E_G\};$ 
2  $E_{L(G)} \leftarrow \emptyset;$ 
3 foreach  $\alpha \in E_G$  do
4   foreach  $\beta \in E_G$  do
5     if  $\alpha_2 = \beta_1$  then
6        $E_{L(G)} \leftarrow E_{L(G)} \cup \{(\alpha, \beta)\};$ 
7     end
8   end
9 end
10  $L(G) \leftarrow (V_{L(G)}, E_{L(G)});$ 
11 return  $L(G);$ 
```
